Product Overview

Student Profiles

See a complete view of each student across academics, attendance, behavior, and supports.

Student Identification & Prioritization

Filter, group, and surface students who need support.

Insights & Early Warning Indicators

Automatically surface risks, trends, and root causes across student data.

Intervention Management

Plan, deliver, and track interventions in one connected workflow.

MTSS Reporting & Dashboards

Track tiered supports and intervention progress across schools.

Student Success Reporting

Surface and investigate trends across academics, attendance, and behavior.

Collaboration & Referrals

Coordinate support across teams with shared visibility.

AI-Powered Workflows

Generate plans and next steps using AI grounded in student data.

Strategic Priorities Advisor

Turn district priorities into clear insights and action.

Secure Integrations

Connect student data across systems in one platform.

Student Profiles

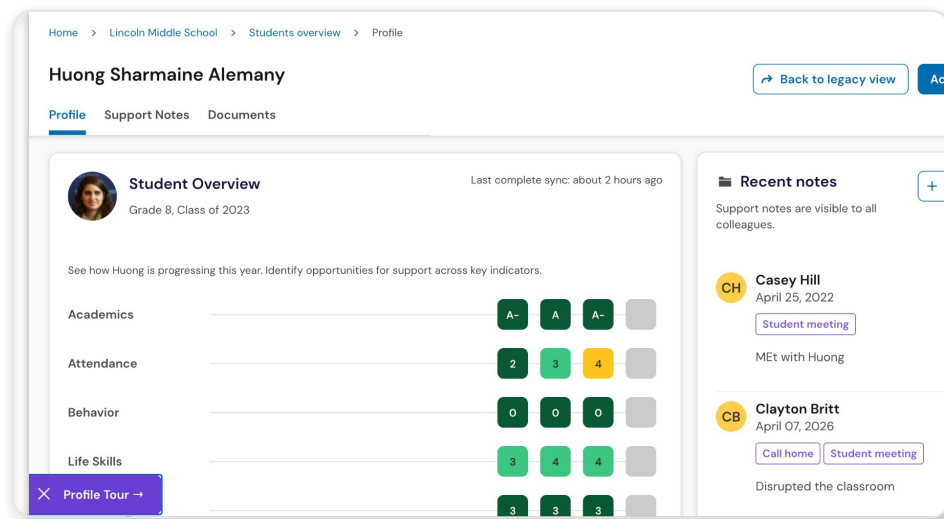

STUDENT DATA & VISIBILITY

See a complete view of individual students across notes, interventions, grades, attendance, behavior, and self-reported skills.

Student Overview shows every student's current status across academics, attendance, behavior, and life skills at a glance from the roster.

District & School Overview surfaces high-level trends across schools and support areas on one dashboard.

Subject Overviews unify coursework and assessment data for a comprehensive picture of ELA, Math, and school-level performance.

Student Identification & Prioritization

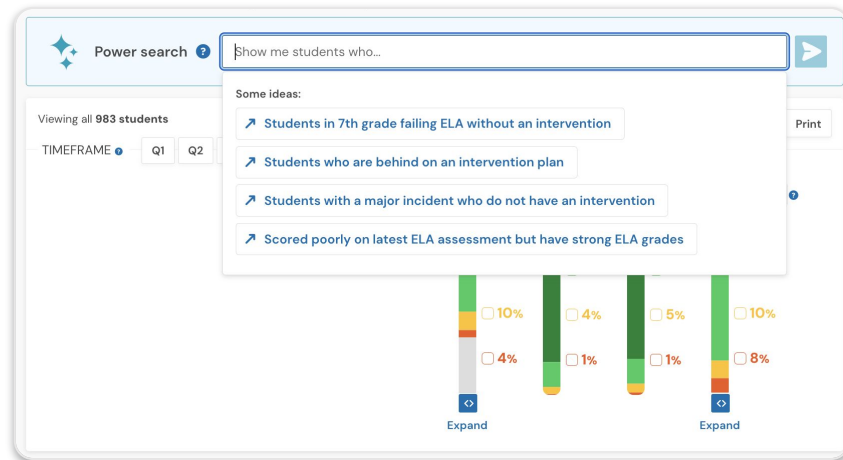

INSIGHTS & RECOMMENDATIONS

Find the right students and monitor cohorts at scale.

Student Groups let educators create and monitor dynamic or static groups of students based on academics, attendance, behavior, interventions, and demographics.

Student Overview surfaces current student performance and support indicators in one unified roster view.

Power Search uses AI to find students and surface trends faster with intuitive, natural-language search.

Insights & Early Warning Indicators

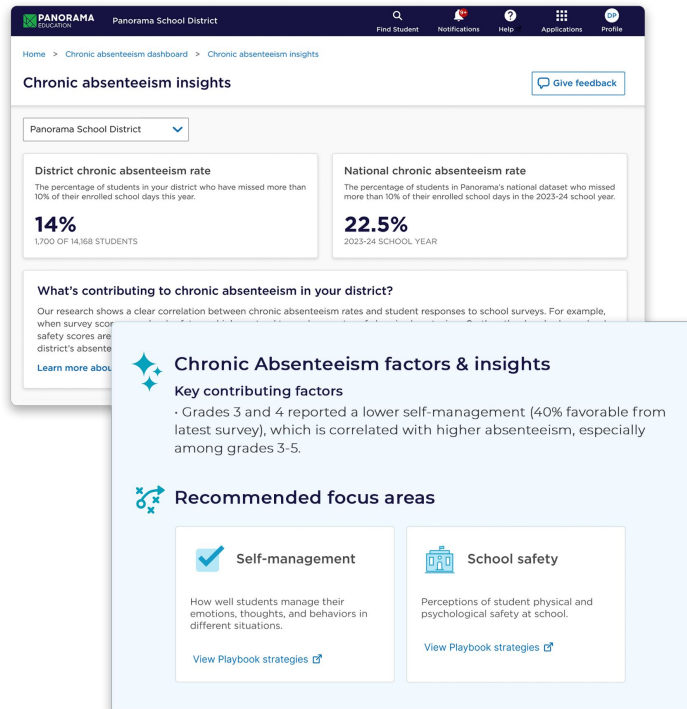

INSIGHTS & RECOMMENDATIONS

Turn student data into action with automatically surfaced insights and recommended next steps.

Insights automatically surface each student's strengths, risks, and trends across all data sources — with recommended support strategies from Panorama Playbook.

Chronic Absenteeism Insights connect survey and attendance data to identify absenteeism patterns and likely root causes.

Strategic Priorities Advisor helps district and school leaders turn their goals into prioritized, data-informed action plans.

Intervention Management

Plan targeted supports for every student who needs them.

Student Interventions allow educators to create individual or group plans with goals, progress monitoring methods, and strategies from 700+ research-backed interventions.

District Intervention Library helps teams use consistent, district-approved strategies across schools, including pre-populated interventions and custom additions.

Progress Monitoring helps educators track whether interventions are working through automatic updates, with trendlines generated automatically after 6+ data points.

Student Referrals route students to the right support teams through a structured, documented workflow.

STUDENT SUPPORT WORKFLOWS

The diagram illustrates the Student Support Workflows, consisting of two main steps: **Create individual intervention** (marked with a green checkmark) and **Set up progress monitoring** (marked with a black circle).

The screenshot shows the interface for creating an intervention, featuring a sidebar with a user profile for Sarah Arbon and a main form. The form includes the following fields:

- Intervention type:** A dropdown menu with options: Math, ELA, Math, Other Academics, Attendance, Behavior, Life Skills, and Science. The "Math" option is selected.
- Tier:** A dropdown menu with options: Tier 1, Tier 2, and Tier 3. The "Tier 2" option is selected.
- Focus area:** A dropdown menu with options: Problem-Solving x, Mathematical Concepts, and Mathematical Concepts. The "Problem-Solving x" option is selected.
- Champion:** A search bar with the text "Superintendent Stacie".
- Monitoring method:** A dropdown menu with options: Custom method, Progress monitoring, and Progress monitoring. The "Custom method" option is selected.
- Monitoring frequency:** A dropdown menu with options: Monthly, Quarterly, and Semi-annually. The "Monthly" option is selected.
- Custom method name:** A text input field with the text "STAR Math".
- Intervention start date:** A date picker showing "6/28/2024".
- Duration:** A dropdown menu with options: 6 weeks, 12 weeks, and 18 weeks. The "6 weeks" option is selected.
- Program Categories (optional):** A dropdown menu with the option "Select option".
- Baseline:** A text input field with the value "350".
- Target:** A text input field with the value "500".
- Pre-intervention reflection:** A text area with the prompt "How is this student doing in regards to the chosen focus area(s)?"

MTSS Reporting & Dashboards

REPORTING

Create consistent visibility into student support across every school.

Interventions Dashboard tracks the percent of tiered supports across schools and summarizes intervention effectiveness — filterable by school, group, or demographic.

Unified Reporting cover academics, attendance, behavior, and interventions in one unified dashboard filterable by school, group, or demographic.

Behavior Logging helps you manage behavior incidents and view all behavior data in one place.

The screenshot displays the 'Interventions' section for a student named Antonetta. It includes a 'Life Skills Tier 2' intervention with a 'Two Word Check-in' strategy, marked as 'On track'. A 'Progress monitoring timeline' shows 'Week 2' completed and 'Week 1' in progress. A 'Support notes' modal is open, showing a table of support notes.

Student Success Reporting

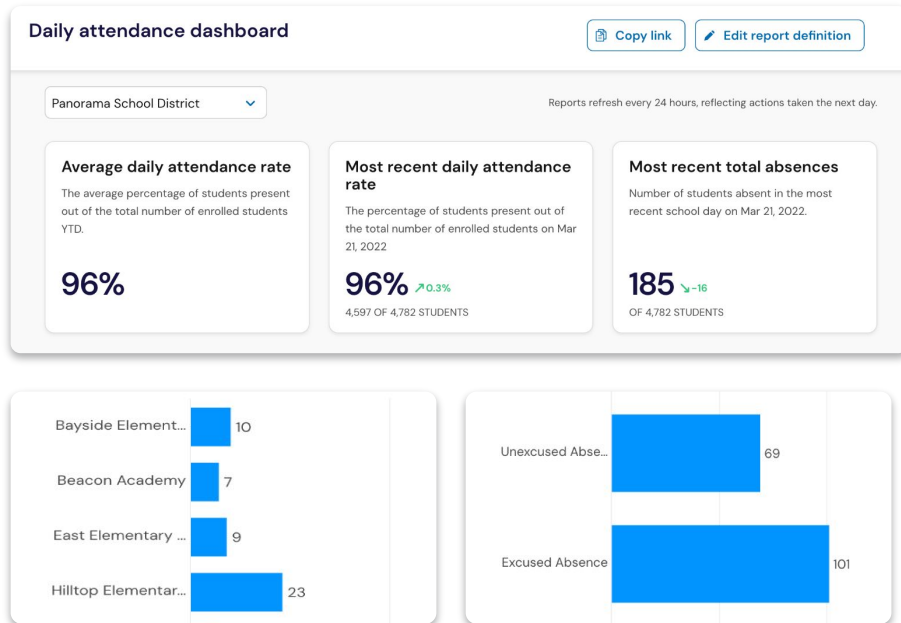

REPORTING

Surface and investigate trends across academics, attendance, and behavior.

Academic Reporting identifies students who may need literacy or math support and tracks performance on assessments over time.

Attendance Reporting tracks chronic absenteeism, daily trends, and recently-absent students at the district and school level.

Behavior Reporting analyzes climate and culture patterns at the district, school, and student level.

Collaboration & Referrals

STUDENT SUPPORT WORKFLOWS

Keep staff and families aligned and connected around every student.

Support Notes compile student context across staff: log calls, observations, meetings, and more in a shared record.

Student Referrals route students to the right support teams through a structured, documented referral workflow.

Family Sharing lets you email guardians or generate a secure link from the student profile, accessible for 45 days.

The screenshot displays the 'Referral details' form. At the top, it states 'Submitted referrals will be visible to all colleagues who have access to the student.' and includes a note '* indicates required fields'. The form is divided into two main sections: '*Primary concern' and '*Areas of concern'. The '*Primary concern' section features a dropdown menu with 'Select primary concern' and a list of categories: Attendance, Behavior (highlighted with a star), ELA, ELD, Gifted, Math, and Other Academic. The '*Areas of concern' section has a dropdown menu with 'Emotion Regulation X' and 'Attention-Seeking Behavior X' selected. Below this, there is a text area for 'Describe details of involvement, if any.' and a section for 'What are the student's strengths?' with four checkboxes: 'Self-management', 'Growth mindset', 'Social awareness', and 'Emotional regulation' (all unchecked), and 'Self-efficacy' (checked). A final section asks 'Has the student's parent or guardian been notified or involved in this concern?' with a text area for details. At the bottom right, there are 'Cancel' and 'Submit' buttons.

AI-Powered Workflows

AI-POWERED WORKFLOWS

Turn data into action faster with AI built into critical workflows.

AI Insights automatically surface student summaries, strengths, and recommended support strategies.

Strategic Priorities Advisor turns district goals into prioritized, actionable plans using an AI-powered planning tool.

Power Search finds students and surfaces trends using natural-language, AI-powered search.

District Intervention Library recommends district-approved strategies based on student need.

Define your priorities

Tell us what your district is focused on, and we'll pull together analytics to help you uncover actionable insights.

✦ Improve student attendance and engagement.

✦ Ensure students feel a strong sense of belonging at school.

✦ Strengthen partnerships between schools and families.

We're focused on improving attendance, while ensuring students feel a strong sense of belonging and safety at school. We also want to ensure all students have equitable transportation options to attend school.

🔍 Uncover insights

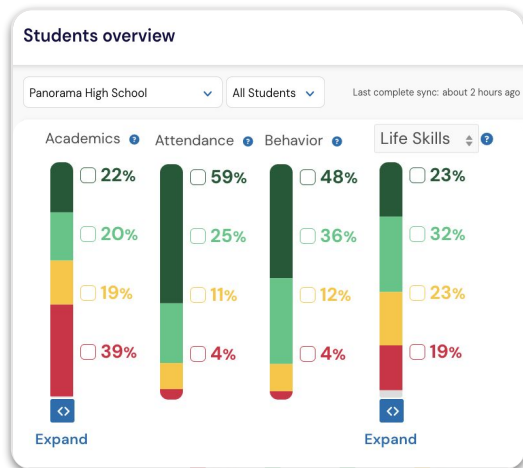

AI can make mistakes. Check for accuracy.

Turn student insight into action with AI connected to your MTSS workflows.

Panorama allows us to quickly make decisions and see whether those decisions are working.

Luke Rasmussen
Ogden School District (UT)

With Panorama's consistent support and guidance, we have not only strengthened our MTSS framework, but also fostered a culture of continuous improvement and collaboration.

Irma Melgoza-Vasquez
Hueneme Elementary School District (CA)

The increase in data literacy among all the leaders in the network has really improved our ability to pinpoint individual students and their areas of opportunity.

Sarah Rabe
School District U-46 (IL)

Raise the floor and ceiling of student support.

Panorama is the platform for student support and learning — helping districts move from seeing student challenges to solving them. By connecting student data and AI with district frameworks, Panorama drives stronger student outcomes across instruction, MTSS, special education, and college and career readiness.
